^ OFS 3.40 to be released soon. Information is based on interoperability testing on beta version.

Fully Integrated Process Automation Solutions

CitectSCADA

CitectSCADA™ is one of the most reliable, flexible and high- performance SCADA systems on the market today. With its powerful visualization capabilities and operational features, it delivers actionable insight faster, enabling operators to respond quickly to process disturbances, thereby increasing their effectiveness.

CitectHistorian

CitectHistorian™ comprises the historian and portal functionalities of the solution, enabling you to accurately store data while connecting your production and business systems through its active data transfers and simple, easy-to-use reporting.

Ampla

Ampla™, Schneider Electric's manufacturing execution software, enables organizations to improve their competitiveness in global markets, increase shareholder returns, increase operational efficiencies and reduce energy consumption.

SCADA & MES Software Global Support offers multi-level support services to our customers. This formalised structure of support is designed to optimise your investment in our operation and optimization software technology.
